PROFESSIONAL SUMMARY

Computer Science graduate with hands-on full-stack development experience through internship and academic projects. Built a secure faculty communication platform serving 50+ users, demonstrating ability to deliver real-world solutions. Proficient in PHP, JavaScript, and Oracle Database. Eager to contribute to a dynamic engineering team while continuously learning and growing as a developer.

TECHNICAL SKILLS

- **Languages:** C, Python, Java, PHP, JavaScript, HTML/CSS
- **Frameworks & Libraries:** React.js, Node.js, Express.js**,** Laravel, Tailwind CSS, Bootstrap
- **Databases:** Oracle Database, MySQL, MongoDB
- **Tools:** Git, GitHub, VS Code, NetBeans, Android Studio
- **Concepts:** REST APIs, JWT, Data Structures & Algorithms
- **Operating Systems**: Windows, Linux

PROFESSIONAL EXPERIENCE

Software Engineering Intern | The International University of Scholars *Feb 2025 – Apr 2025*

- Co-developed a secure web-based SMS communication platform for internal faculty use, serving 50+ users.
- Engineered dynamic features using JSP and Oracle Database to ensure data privacy and system reliability.
- Integrated an offline SMS gateway to enable critical communication without internet access.
- Collaborated with faculty members to gather technical requirements and delivered the solution ahead of schedule.

PROJECTS

Smart Tourism Recommendation System (STRS) | GitHub

React.js, Node.js, Express.js, Oracle Database

- Built a full-stack travel planning platform with 10+ destinations across Bangladesh
- Engineered an intelligent recommendation engine using interest-based filtering
- Designed a normalized Oracle database with 14+ relational tables
- Built a dynamic trip planner with real-time cost calculation
- Implemented secure JWT authentication with role-based access control

TiffinCraft (Multi-Vendor Cloud Kitchen Marketplace) | GitHub

PHP, Oracle, JavaScript

- Built a scalable multi-vendor marketplace with role-based access control
- Implemented secure authentication, menu management, and order processing
- Designed a normalized Oracle database with 15+ relational tables
- Added filtering, pagination, and review system

Database Management Bot | GitHub

Python, SQL, AI APIs

- Built a tool that converts natural language questions into SQL queries with ~85% accuracy
- Integrated query execution and results display within a command-line interface

GalaxyPilot (2D Space Shooter) | GitHub

Java, LibGDX, MongoDB

- Developed a mobile game using the LibGDX framework and Android Studio
- Integrated MongoDB to manage and store persistent high scores across user sessions

EDUCATION

BSc in Computer Science and Engineering (CSE)
The International University of Scholars, Dhaka

- **Graduation Date:** April 15, 2025 | CGPA: 3.60 / 4.00

EXTRACURRICULAR ACTIVITIES

- Presented a technical project at **Digital Bangladesh Mela 2023**.
- Active member of the University Computer Club.
- Participated in programming contests to strengthen team-based problem-solving skills.
- Volunteered for various university initiatives and community events.
